

Fire Weather

NWS Springfield provides fire weather forecasts for federal land areas in southwest and south central Missouri. Our goal is to provide the best forecast support possible to federal land managers involved in fire suppression and prescribed burn operations.

<http://www.crh.noaa.gov/sgf/firewxpage.shtml>

Fire Weather forecast seasons are normally in the late Winter/Spring (February-early May) and in the Fall (October - early December). Fire weather related products are issued outside these normal seasons on an as needed basis.

Product	Product ID	WMO Header	Issuance
Fire Weather Forecast	STLFFWSGF	FNUS53	0800, 1400
Red Flag Watch/Warning	STLRFWSGF	WWUS83	as needed
